Sodium tripolyphosphate for industrial use

Molecular formula: Na₅P₃O₁₀ Relative molecular weight: 367.86 No. of standard: GB/T 9983-2004

Item	Specifications
Na₅P₃O₁0, ≥	94
P_2O_5 , %	57
Water insoluble, % ≤	0.10
Iron (Fe), % ≤	0.015
Ph (10g/L solution)	9.2~10.0
Whiteness (W_{10}) , $\%$	90
Phase I, %	15-35
Particle size (residual on 1.00mm Trv-sieve), $\% \leqslant$	5.0
Bulk Density (g/cm³)	0.53-0.6
Appearance	White granular

Uses: Mainly used in china

Packing: plastic weave outside with plastic film inside, net weight: 25kg;

or based on the demand of user.
